

# THEY MISSED THE POINT

## The health care decision that's not doctor approved

The Government of  
Newfoundland and Labrador  
has cut physician-delivered  
flu shots under MCP

Doctors are concerned that  
this will reduce patient access  
and lead to more cases  
of influenza

If you share these concerns, visit [FLUNL.CA](https://flunl.ca)  
and call on government to reverse the decision
