

# THEY MISSED THE POINT

**The health care decision that's not doctor approved.**

The Government of Newfoundland and Labrador is looking for ways to save money. They believe that taking away your ability to get the flu shot from your doctor is the way to do it. This decision limits patient choice and will lead to more cases of influenza this flu season.

Reducing access for up to 45,000 people who get the flu shot from their doctor puts patients at risk. Our province already has the second-lowest flu vaccination rate in Canada.

Doctors are also concerned that Community Health flu shot clinics will not have the resources they need to meet the increased patient demand leading to longer wait times for patients.

Stop government from making decisions that could harm your health or the health of your loved ones.

**Get informed at [FLUNL.CA](https://flunl.ca) and sign the petition to reverse government's decision.**
