

# New Provincial Health Information System

## ABOUT

---

- Newfoundland and Labrador Centre for Health Information (NLCHI), in conjunction with the Regional Health Authorities, will be replacing Meditech Magic and Client Server with a new Health Information System (HIS).
- The procurement process is now complete and the preferred vendor has been identified.
- The new system will meet provincial requirements and functionality, reduce paper processes, and enhance clinical scope.
- Work has commenced to establish the governance structure and project team as final contract negotiations continue.

## BENEFITS

- |  |  |  |                          |
|--|--|--|--------------------------|
|  | Holistic view of the patient                               |  | Improved data collection |
|  | Improved coordination of patient care                      |  | Reduction in costs       |
|  | Enhanced sharing of patient information across disciplines |  | Reduction in time        |
|  | Streamlined workflows                                      |  | Reduction in errors      |

## Communications

---

Engagement sessions will commence soon. You will begin to receive communication updating you on the status of the project, meeting invitations to participate in engagement sessions, and other pertinent information.

We look forward to meeting with you during our upcoming engagement sessions. Your feedback will help shape our journey towards a new Provincial Health Information System.
