

INVITATION

Long COVID ECHO

A new community of practice starting 14 March 2025

Join our ECHO community of practice for clinicians caring for people with Long COVID—a regular virtual forum designed to enhance knowledge and support best practices.

Part of the broader Long COVID Web network led by Dr. Angela Cheung, this ECHO offers an interactive space for healthcare professionals to stay up to date on emerging evidence and discuss de-identified complex cases.

Led by Dr. Jane McKay (BC) and Dr. Iram Anees (NL), these sessions aim to build confidence in care provision and improve patient outcomes.

Learn more: longcovidweb.ca/echo

Clinicians can earn Continuing Medical Education (CME) credits for attending ECHO sessions.
